

Locline

Locline is a two-part system, which includes a base and a locking strip.

We have adjusted the PVC formulation using high impact UV resistant material which has an added acrylic modifier which reduces previous softening of the product and we have adjusted the locking tolerance to allow a tighter seal.

Locline is designed to attach materials either permanently, or semi-permanently and is quickly detachable. It's flexible, adjustable and needs no stitching or pattern making skills.

The simplicity of Locline's design means it is not only incredibly easy to fit and use, but it's continuous seal means it will stay totally waterproof with no moving parts to wear out.

Locline can be used on straight and mild curved areas

End Use Application

Designed to attach material for semi-permanent or permanent structures.

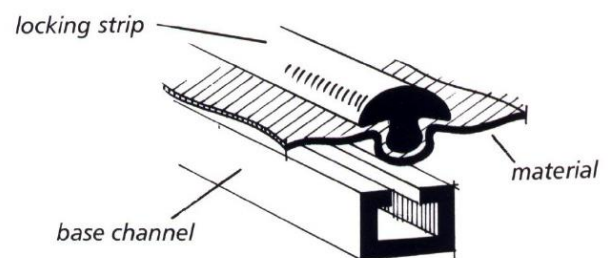

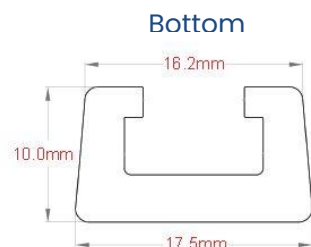

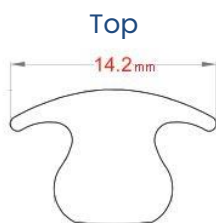

Locline is suitable for Marine, Banners – print media, covers, shade applications

Other Information

For best results it is recommended when joining the male-female together we suggest using a Polyurethane or Nylon mallet

SPECIFICATIONS

Composition	PVC high impact UV resistant material with acrylic modifiers
Length	300cm
Colour	Black or White
Material Tolerance	Suggested maximum material thickness 0.75micron (0.7mm)
